**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102/Claim Rejections - 35 USC § 103***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1, 4-8, 12 and 13 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Spanier et al. (US Patent 4904494).

Spanier et al. teaches making a dog snack which may include a preservative in the amount 0.01 to 4 weight percent. Sorbic acid is listed as one of seven specified suitable preservatives. See col. 8, paragraph 7. See MPEP 2112 (Requirements of Rejection based on inherency; Burden of proof). Something which is old does not become patentable upon the discovery of a new property. The claiming of a new use, new function or unknown property does not necessarily make the claim patentable. In re Best, 562 F.2d 1252, 1254, 195 USPQ 430, 433 (CCPA 1977).

Art Unit: 1761

This rejection is being under both statutes because of applicant's amendment specifying agricultural livestock feedstuffs. Although the reference teaches sorbic acid in a dog food, and in the same amount, one of ordinary skill in the art would reasonably expect the same result in any other foodstuff including the livestock feedstuff. Claims 4-8 are rendered obvious since all are animals. Claim 12 would be inherent. Claim 13 is anticipated since grains are used in the dog food also.

### ***Response to Arguments***

Applicant's arguments filed 12/3/04 have been fully considered but they are not persuasive.

In the rejection made after allowance, it was noted that the addition of sorbic acid, selected from a list of 7 preservatives in the same or similar amounts rendered the invention inherent because "Something which is old does not become patentable upon the discovery of a new property. The claiming of a new use, new function or unknown property does not necessarily make the claim patentable". The claims were found not allowable. Applicant's adding the new limitation "agricultural livestock" and the addition of claim 13 does not overcome the statement: "The claiming of a new use, new function or unknown property does not necessarily make the claim patentable". Also, the unobvious result claimed at claim 12, would be inherent and the fact that sorbic acid providing an increased growth rate in the instant claims, while sorbic acid in the dog food was used as a preservative, has been held in the rejection as "the discovery of a new property" and that "Something which is old does not become patentable upon the discovery of a new property." The claims are held unpatentable over Spanier et al.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
